Professional Experience Feb 1998 - Present Adept Corporation
New York, NY

Program Manager Jan 2002 - Present
Data Management and Decision Support Systems

★ Developed proposal to secure capital funding to support a data integration & decision support project in an area of strategic importance to the company. Interacted with IT leadership and Technology (Research) leadership to establish business case, estimated project costs, and developed data warehousing and decision support strategy. Project awaiting approval from CTO and CIO of the company. Approval expected by end of May.

★ Identifying product technologies and developing project execution strategy. Decision support tools are expected to be deployed to a world-wide group of users. Programming platforms expected to be Microsoft .NET for the desktop tools and Java/C++ and Oracle for server-side analysis. Total project costs expected to be approximately \$4 million over the next 2 years.

Program Manager Jun 2000 - Dec2001
Biotech IT Program

Molecular Breeding IT Program

Achievements

★ Successfully led two different IT program teams comprising 27 individuals (including project managers, developers, testers, and analysts) in a matrix organization. Met, or exceeded, all program goals while reducing costs.
